Elsevier's Regional Transport Studies Journals

Each of our regional transport studies journals aims at providing useful insights into solving transport-related issues specific to its region, from both theoretical and practical perspectives. They cover all transport modes and all issues in the transport sector. While papers dealing with region-specific issues are especially welcome, more general transportation papers by authors from their regions are also within the scope of these journals.

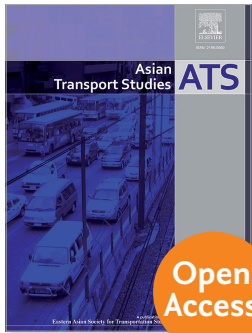

African Transport Studies

Editor-in-Chief: Roger Behrens, Ph.D.

University of Cape Town Centre for Transport Studies, Cape Town, South Africa

African Transport Research (AFTRAN) is a new refereed international journal. It is the official journal of the Society for African Transport Research.
